TREND®

Born with style

Beautiful
yet functional.

Thought provoking
yet practical.

etherium®
By E-Stone...
The surface that
lasts a lifetime.

etherium.[®] By E-Stone

has the look of rare stone cut from select quarries, yet it's made with up to 72% post-consumer recycled materials. It is formed by the fusion of millions of tiny pieces, yet is practically unbreakable, unscratchable and unstainable.

Uniqueness in contrast

Using cutting-edge technology, E-Stone blends **natural stone and quartz** with specially selected glass and other raw elements to produce engineered agglomerate slabs of 300 x 120 cm | 118" x 48" and 6,6 mm | 1/4" thickness.

etherium® By E-Stone is ideal for **multi-use purposes**: from countertops to high traffic floors to tub surrounds and shower walls, and even custom-curved surfaces.

We protect
your surfaces...
continuously.

With built-in 24/7 Microban® antimicrobial technology surfaces:

- Stay up to 99.8% cleaner
- Fight bacteria all day, every day
- Are protected for a lifetime

PROTECTION THAT LIVES ON
MICROBAN®

What is Microban®?

Microban® is the **global leader in antimicrobial technology** targeting the invisible microbes that contaminate surfaces. Working continuously, Microban® technology has been proven effective against a broad spectrum of bacteria to fight growth **24 hours, 7 days a week for the lifetime** of the surface/product. Infusing this technology into engineered stone makes **etherium® By E-Stone the perfect surface material** for use on floors, walls, countertops, and bathrooms in areas like hospitals, offices, homes where people want to worry less.

How the technology works

24-hour confocal photography of treated and untreated surfaces. The incorporated Microban® technology creates an inhospitable environment for bacteria growth, inhibiting reproduction and bacteria ultimately dies off.

Disclaimer: Microban® technology is not designed to protect users against disease causing microorganisms. Microban® Products Company makes neither direct nor implied health claims. Normal cleaning practices should be maintained.

What are the benefits of Microban®

Invisible protection, visible cleanliness
Product cleanliness is visibly improved without affecting the appearance, functions of durability of your product.

Works continuously
Microban® actively reduces the growth of bacteria 24hours a day, 7days a week.

Cleaner between cleanings & easier to clean
While not a substitute for regular cleaning, the added technology keeps products cleaner.

Protection that lasts the life of the product
Once integrated during manufacture, Microban® will last for the expected lifetime of a product or surface.

Extended product lifetime
Inhibiting the growth of degrading microbes means the expected lifetime of your product is extended.

Effective against a broad spectrum of bacteria
Microban® technology has been proven effective against a broad spectrum of bacteria.

Innovation at its finest

etherium® By E-Stone is recognized by the **U.S. Green Building Council (USGBC), GREENGUARD, Declare,** and **NSF** for health, safety, and eco-friendly standards and practices.

etherium® By E-Stone surfaces contribute measurably to **LEED ratings** based on credits for Material and Resources, Indoor Environmental Quality, and Innovation and Design.

E-Stone

Located in Sebring, Florida, E-Stone is a state-of-the-art manufacturing facility currently producing over 8 million square feet of engineered agglomerate surfaces annually. E-Stone's facilities are designed with sophisticated water recycling systems (99.8% of water is recycled) that significantly reduce water consumption and the proliferation of pollutants.

Green is much more than a color

TREND Group's products are manufactured using up **to 72% of post-consumer recycled glass** and **60% less raw material**.

TREND Group was born with an eco-friendly philosophy at a time when sustainability and environmental awareness were still not popular concerns.

An approach not only driven by ethical reasons but our way of giving back to nature a part of what we receive from it as a source of inspiration for our creativity.

Our care for the environment is reflected in our products, which are manufactured using up to 72% post-consumer recycled glass and 60% less natural raw material.

We collaborate with leading global environmental organisations, architects and designers to promote sustainable building practices.

Post-consumer recycled glass

Combining technological advances with environmental awareness, TREND's etherium® By E-Stone surfaces are manufactured using post-consumer recycled glass.

Beautiful curves

A category of products with the strength to last forever and the flexibility to be shaped to match your dreams.

Example of how a plate can be cut and transformed to create a counter.

Curves for diameters equal to or greater than 160 cm | 63"

Trascenda[®]:
from thoughts
to designs,
from designs
to surfaces

We named this collection Trascenda® because of its capacity to capture an idea that is infused into our surfaces.

The results are impressions, feelings and emotions that will last forever.

SPECIFICATIONS

etherium[®] By E-Stone
Composite of granules selected industrially and created in a large commercial slab with a maximum size of 300 cm x 120 cm, a nominal thickness of 6.6 mm and a weight of approximately 14kg/m². It is obtained through vibro-compression and consists of about 93% selected granules of various types such as post-consumer recycled glass, recycled pre-consumer porcelain, glass mosaic, quartz, granite, mixed together, in different sizes, with a minimum quantity of polyester resin and coloured powder pigments.

etherium[®] By E-Stone
Composito di graniglie selezionate prodotto industrialmente sotto forma di grande lastra di formato commerciale massimo 300 x 120 cm, con uno spessore nominale di 6,6 mm e un peso di circa 14 kg/m². Si ottiene per mezzo di vibro-compressione ed è costituito per il 93% da graniglie selezionate di vario tipo come vetro riciclato post consumo, porcellana riciclata pre-consumo, mosaico di vetro, quarzo, granito, mescolate tra loro, in diverse granulometrie, con resina poliestere in quantità minima e pigmenti colorati in polvere.

etherium[®] By E-Stone
Composite de granulés sélectionnés industriellement et créé dans une grande dalle commerciale d'une taille maximale de 300 cm x 120 cm, une épaisseur nominale de 6,6 mm et un poids d'environ 14 kg / m². Il est obtenu par vibro-compression et se compose d'environ 93% de granulés sélectionnés de différents types tels que le verre recyclé post-consommation, la porcelaine pré-consommation recyclée, la mosaïque de verre, le quartz, le granit, mélangés ensemble, dans différentes tailles, avec une quantité minimale de résine polyester et de pigments en poudre colorés.

etherium[®] By E-Stone
Verbundmaterial aus ausgewählten Splittern, industriell hergestellt in Form einer großen Platte mit einem Handelsformat von bis zu 300 x 120 cm, einer Nennstärke von 6,6 mm und einem Gewicht von etwa 14 kg/ m². Es wird mittels Rüttelverdichtung erhalten und besteht zu 93 % aus Splittern verschiedener Art, wie aus nach dem Verbrauch recyceltem Glas, vor dem Verbrauch recyceltem Porzellan, Glasmosaik, Quarz und Granit mit unterschiedlicher Korngröße, die miteinander sowie einer minimalen Menge von Polyesterharz und Farbpigmenten in Pulverform vermischt werden.

etherium[®] By E-Stone
Compuesto de granillas seleccionadas producido industrialmente en forma de losas grandes con formato comercial máximo de 300 cm x 120 cm, espesor nominal de 6,6 mm y peso de unos 14 kg/m². Se obtiene por medio de vibro-compresión y está formado en un 93% por granillas seleccionadas de varios tipos: vidrio reciclado postconsumo, porcelana reciclada preconsumo, mosaico de vidrio, cuarzo, granito, mezcladas entre sí, de diferentes granulometrías, con una cantidad mínima de resina de poliéster y con pigmentos de colores en polvo.

etherium[®] By E-Stone
Композитный материал из отборной крошки, произведенный промышленным способом в виде больших плит коммерческого максимального формата 300см x 120см, номинальной толщиной 6,6 мм и весом около 14кг/м2. Изготавливается с помощью виброуплотнения и на 93% состоит из отборной крошки различного типа: вторично переработанного стекла "после потребителя", вторично переработанного фарфора "до потребителя", стеклянной мозаики, кварца, гранита, перемешанных между собой, с гранулами различного размера, с минимальным количеством полиэфирной смолы и порошковыми цветными пигментами.
