ABOUT US

We have one of the largest selections of fiberglass planter standard styles and sizes offered in our industry. If you have a special need regarding length, width, height, or even style, let our sales staff assist you to find a solution for your project.

Three Features of Fiberglass Planters

- ◆ **Lightweight** Fiberglass planters weigh about 1 pound per 1/8” of thickness per square foot of surface. That mean large fiberglass planters cost less than heaver product to ship or install. No need for cranes or extra reinforcement for roofs or floors. Wheels or lift truck pockets can be incorporated to make moving after planting easy.
- ◆ **Durable** Fiberglass is designed, tested and built to last for decades. That means there is less waste heading to landfills. The strength of fiberglass exceeds concrete 10 times our thickness, which means that invasive root systems don't penetrate fiberglass planter walls. Over time roots won't crack the planter and leak.
- ◆ **Watertight** Fiberglass boats keep water out and fiberglass planters keep water in. You need to use less water in un-drained planters. All our planters are tested before shipping to insure quality. We still recommend installers water test the planters before planting.

When you specify The Chandler Company, you are specifying product fabricated in our manufacturing facility in Santa Ana, California since the early 1980's. Product that is proudly made in the U.S.A.

Light Sand Finish

CUSTOM PLANTERS

Over the years we have been asked to make uncommon shapes for specific applications. We can do the same for you. If you are looking for something to set your project apart from the ordinary, contact us for help.

Custom Curved Shape Planter

Long Beach World Trade Center - Long Beach, CA

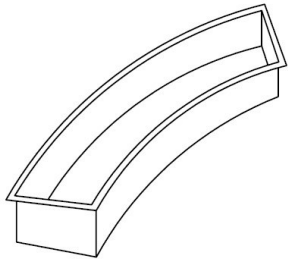

Custom Parking Structure Planter

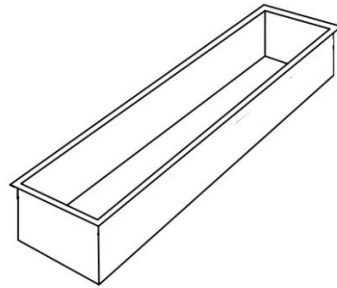

BUILT-IN PLANTER LINERS

Liners can be installed to create a continuous run of planting space. More durable than metal liner, that are prone to rusting, fiberglass liners are the obvious solution. Liners can be fabricated with or without lips to accept the cap or flashing of your choice. Drains may be installed during the fabrication process or at the site. We will coordinate with the landscaper or designer to find the best application.

Shape Options:

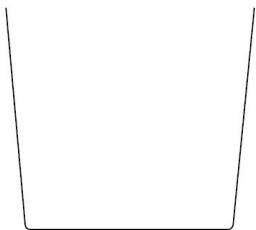

Curved

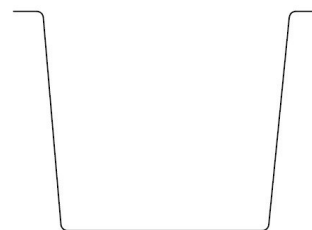

Straight

Lip Options:

Del Amo Fashion Center - Torrance, CA

MONA TANK SYSTEM

Inspired by Nature

An advanced and well proven subterranean irrigation system suitable for interior and exterior planting applications. The Mona Plant System is versatile, cost effective and environmentally friendly. The perfect solution for any sustainable landscaping project large or small.

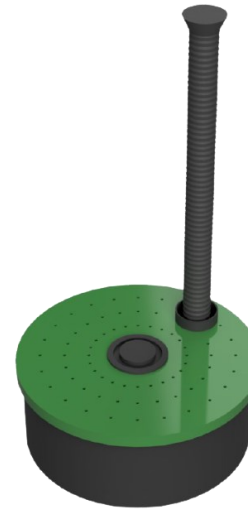

- A subterranean self contained system
 - Manufactured in the UK, all parts are recyclable
 - No Mechanical, electrical or moving parts
 - Simple to install
 - Plant's roots absorb water from the Mona tanks as and when they require it. (Capillary action)
 - Eliminates over-watering and water wastage
 - Aerates soil
 - Reduces watering frequency
- The Mona Plant System ensures water and nutrients are delivered in the correct quantity to the roots of plants and trees. This results in healthy root development and optimum growth.

The Mona Plant System is manufactured by Green-Tech Ltd. and distributed in the United States by The Chandler Company. It has been specified on many projects across the UK, Europe and USA for over 30 years!

Visit our website or talk to a salesperson for more details!

CASTERS

We have one of the largest selections of fiberglass planter standard styles and sizes offered in our industry. If you have a special need regarding length, width, height, or even style, let our sales staff assist you to find a solution for your project.

Three Features of Fiberglass Planters

- ◆ **Lightweight** Fiberglass planters weigh about 1 pound per 1/8" of thickness per square foot of surface. That mean large fiberglass planters cost less than heaver product to ship or install. No need for cranes or extra reinforcement for roofs or floors. Wheels or lift truck pockets can be incorporated to make moving after planting easy.
- ◆ **Durable** Fiberglass is designed, tested and built to last for decades. That means there is less waste heading to landfills. The strength of fiberglass exceeds concrete 10 times our thickness, which means that invasive root systems don't penetrate fiberglass planter walls. Over time roots won't crack the planter and leak.
- ◆ **Watertight** Fiberglass boats keep water out and fiberglass planters keep water in. You need to use less water in un-drained planters. All our planters are tested before shipping to insure quality. We still recommend installers water test the planters before planting.

When you specify The Chandler Company, you are specifying product fabricated in our manufacturing facility in Santa Ana, California since the early 1980's. Product that is proudly made in the U.S.A.

WARRANTY

The Chandler Company warrants its products, when purchased new, to be free from defects in materials and workmanship under normal use and service for three years from the original date of shipping. Replacement or repair at the option of The Chandler Company of defective parts shall be the sole remedy of this warranty.

MAINTENANCE

Planters in an Exterior Setting:

Use the same cleaning and maintenance procedures that would apply to the exterior of a commercial building.

- ◆ Pressure washing with water to remove dust and dirt.
- ◆ Graffiti may require painting over. Try acetone or other paint-removing solvents after testing the solvent on an obscure area of the planter.
- ◆ Repaint with exterior building paint as often as the surrounding structures require or as desired.
- ◆ Smooth finished planters will need to be lightly sanded to remove any oils or waxy topical finishes in order for the paint to adhere properly.

Planters in an Interior Setting:

Use the same cleaning and maintenance procedures that would apply to any interior site furnishings.
